If users want to make sure that Docker is up and running they can run “docker run hello-world”	Documentation enhancement
Port is fixed to 10001. The port should be configurable for administrative reasons	Potential ops issue
I went to Settings -> Topic Editor and created a topic. Then I went to Gather and pressed Update Now and I got: 500 error: aunooai-1 File "/app/app/routes/keyword_monitor.py", line 307, in check_now aunooai-1 raise HTTPException(status_code=500, detail=result.get('error', 'Unknown error')) aunooai-1 fastapi.exceptions.HTTPException: 500: Failed to initialize collector Even after I delete my topics, the error persists	Crash
Discord invite does not work (https://discord.com/invite/hEUNYDm5KH) from the Web, works fine via Discord app	Misc
Dark Mode is a no-op	Bug
No documented process on how to reset forgotten password. If I forget admin password, I need to nuke the entire installation	Access management
I configure NewsAPI:  but backend searches for theNewsAPI: <pre> aunooai-1 2025-12-01 17:47:07,720 - app.tasks.keyword_monitor - INFO - Starting keyword check for all groups... aunooai-1 2025-12-01 17:47:07,722 - app.tasks.keyword_monitor - INFO - Initializing collectors for providers: ['thenewsapi'] aunooai-1 2025-12-01 17:47:07,722 - app.collectors.thenewsapi_collector - ERROR - TheNewsAPI key not found in environment aunooai-1 2025-12-01 17:47:07,722 - app.tasks.keyword_monitor - ERROR - X Failed to initialize thenewsapi: TheNewsAPI key not configured aunooai-1 2025-12-01 17:47:07,722 - app.tasks.keyword_monitor - ERROR - No collectors were initialized successfully aunooai-1 2025-12-01 17:47:07,722 - app.tasks.keyword_monitor - ERROR - Failed to initialize collector, skipping check </pre>	Bug?
Test button is missing for provider configuration. This is a big issue since I am not sure what is working and what is not.	Bug

News Feeds NewsAPI Configured Remove	
If I misconfigure a provider, there is no error in the UI but I see it in the container logs: <pre>2025-12-01 17:45:14.682 - app.tasks.keyword_monitor - INFO - Searching with thenewsapi for keyword: security-orchestrator and orchestrator ... 2025-12-01 17:45:14.682 - app.collectors.thenewsapi_collector - ERROR - ❌ TheNewsAPI HTTP ERROR 2025-12-01 17:45:14.682 - app.collectors.thenewsapi_collector - ERROR - ❌ Status Code: 401 2025-12-01 17:45:14.683 - app.collectors.thenewsapi_collector - ERROR - ❌ Content-Type: application/json 2025-12-01 17:45:14.683 - app.collectors.thenewsapi_collector - ERROR - ❌ URL: https://api.thenewsapi.com/v1/news/all?api_token=316f02225e4c4d7bbe6edd36bfd706a6&search=security-orchestrator 2025-12-01 17:45:14.683 - app.collectors.thenewsapi_collector - ERROR - ❌ Error Response (JSON): {'error': {'code': 'invalid_api_token', 'message': 'An invalid API token was supplied.'}} 2025-12-01 17:45:14.685 - app.tasks.keyword_monitor - INFO - thenewsapi: Found 0 articles 2025-12-01 17:45:14.686 - app.tasks.keyword_monitor - INFO - Deduplicated 0 articles to 0 unique articles</pre>	Bug
